

Trailing 4-Quarters Moving Average Chart

Example -- See "Buy It!" Below.

Use the second page (down) to customize your own T4Q.

UPDATED -- 2012

HOW TO GET STARTED:

Example of charting Customer Satisfaction Index (CSI) data on a T4Q (Trailing Four Quarter) basis. You'll get a chart with NO SEASONALITY and every point is comparable to every other point. Look at this T4Q chart quarterly to see things you never saw before about your business!

It's a ROLLING 4-QUARTER AVERAGE tracked quarterly. T4Q charts will clearly tell you whether you're doing good or bad! Ordinary quarterly charts often mislead and show little other than seasonality (see charts below, with fourth quarter seasonal downturns in the Ordinary Chart).

You want to know both about seasonality and about the true trend, Only T4Q's show true trend. T4Q charts also show historical perspective.

Use a regular spreadsheet software package like Lotus or Excel. Enter the quarter/year in Column E and quarterly data in Column C as shown below. Then enter a sum function in the spreadsheet in Column F, Row 24: =sum(F24...F27) and now copy it on down that column.

This is a simple 4-quarter sum that moves forward one quarter (and down one row) at a time. Then chart on the same page using the spreadsheet Chart Function. Better yet, enter your data in the columns in the clean spreadsheet below this one, label it as your own, save and print!

	Quarterly Index	Qtr-Year	T4Q Average Index for T4Q Chart
Row 1	8.3	Q1-06	
Row 2	8.5	Q2-06	
Row 3	8.7	Q3-06	
Row 4	7.3	Q4-06	8.20
Row 5	7.7	Q1-07	8.05
Row 6	8.2	Q2-07	7.98
Row 7	8.5	Q3-07	7.93
Row 8	8.1	Q4-07	8.13
Row 9	9.0	Q1-08	8.45
Row 10	9.1	Q2-08	8.68
Row 11	9.0	Q3-08	8.80
Row 12	8.4	Q4-08	8.88
Row 13	9.3	Q1-09	8.95
Row 14	9.4	Q2-09	9.03
Row 15	9.5	Q3-09	9.15
Row 16	8.8	Q4-09	9.25
Row 17	9.5	Q1-10	9.30
Row 18	9.6	Q2-10	9.35
Row 19	9.6	Q3-10	9.38
Row 20	9.1	Q4-10	9.45
Row 21	9.7	Q1-11	9.50
Row 22	9.7	Q2-11	9.53
Row 23	9.7	Q3-11	9.55
Row 24	9.2	Q4-11	9.58
Row 25		Q1-12	
Row 26		Q2-12	
Row 27		Q3-12	
Row 28		Q4-12	

Now look at your T4Q chart: if it's going up this quarter, that's GOOD! If it's going down, that's VERY BAD! And this then requires IMMEDIATE ACTION by you to make it improve! Use this T4Q technique to track Customer Satisfaction, Employee Satisfaction, and just about anything else of importance to you. You'll be amazed at your improved success! Line up Ordinary charts above the T4Q to see your seasonality, then work to "fill up" the troughs in your year! (See the true meaning of the two seasonal downs from the Ordinary chart on the T4Q!)

CEO Tools: Software & Tools License

CUSTOMER LICENSE AGREEMENT for CEO Tools

IMPORTANT: THE ENCLOSED PROGRAM, SOFTWARE, AND/OR TOOLS ARE LICENSED BY U.S. CORPORATE PARTNERS, LLLP TO CUSTOMERS FOR USE ONLY ON THE TERMS SET FORTH BELOW. OPENING, LOADING AND/OR USING THIS PACKAGE ON YOUR COMPUTER INDICATES YOUR ACCEPTANCE OF THESE TERMS.

1. LICENSE: U.S. Corporate Partners, LLLP hereby agrees to grant you (as an individual user) a nonexclusive license to the enclosed CEO TOOL(s) (collectively and individually, the “Program”) subject to the terms and conditions set forth in this Customer License Agreement.

2. COPYRIGHT: The Program and its documentation are copyrighted. All rights are reserved. No portion of the Program may be duplicated in any way except to use it in your business on a single computer for each Program purchased. You may not reproduce the Program or its documentation except to place it on your own computer for operation and for what is necessary to provide adequate backup.

3. RESTRICTIONS ON USE AND TRANSFER: The original and any backup copies of this Program and its documentation are to be used with only one computer. You may physically transfer the Program from one computer to another provided the Program is only in use by one computer at a time. The Program may not be transferred to a third party without the written permission of Corporate Partners Inc.

4. NO SOFTWARE SUPPORT: The Program is provided without software support and with no provision for human interaction to help with its use. Refer to the book titled *CEO Tools: The Nuts-n-Bolts of Business for Every Manager's Success!* for information on use of the Program and especially individual CEO Tools. Consulting, for a fee, is available – contact U.S. Corporate Partners, LLLP as provided below.

5. NO WARRANTY OF PERFORMANCE: U.S. Corporate Partners, LLLP and Corporate Partners Inc. and everyone associated with the creation and supply of this Program do not warrant this Program in any way, nor are the results obtained from using this Program warranted in any way whatsoever. The Program and its documentation are licensed “as is” without warranty as to their performance.

6. LIMITATION OF LIABILITY: Neither U.S. Corporate Partners, LLLP, Corporate Partners Inc. nor anyone who has been involved in the creation, production, or delivery of this Program shall be liable for any direct, incidental, or consequential damages, such as but not limited to, loss of anticipated profits or benefits, resulting from the use of the Program or arising out of any breach of any agreement.

7. TERM: This license is effective until terminated. You may terminate the license at any time by destroying the Program and documentation together with all backup copies, modifications, and merged portions in any form. This license will also terminate if you fail to comply with any term or condition of this License Agreement.

8. ENTIRE AGREEMENT: By opening or loading or use of this Program, you acknowledge that you have read this License Agreement and in every respect agree to its terms and conditions. You further agree this License Agreement is the complete and exclusive expression of all agreements between us.

Kraig's Chart Tips

1. **Line graphs, never bar charts, seldom pie.**
2. **One graph per chart...stack charts vertically if you want comparatives!**
3. **Two years of history plus the year we're now in and tracking.**
4. **Re-scale to fill up vertical space (see Page 7 aka Fix Up Your Chart!).**
5. **T12M for one variable vs. 12MMA for two (% , ratio, index).**
6. **Right chart time frequency: T12M, T4Q, T52W, and/or T365D.**
7. **Power-Tools: 4-Charts, 5-Charts, 8-Charts @ www.ceotools.com.**
8. **Only T12M-type charts; those ordinary and YTD charts lie!**
9. **You can track ANYTHING with T12M and related charts.**
10. **Use to forecast budget or projections – and track actuals against.**
11. **No trailing 3-month, 6-month, or 18-month charts: they'll bite you!**
12. **Charts should have white background and big data point markers along the lines of your graphs.**
13. **Eventually, we'll talk about 3-over-3 and 12-over-12 charts (also known as rate-of-change charts), but please understand T12Ms thoroughly first, else confusion will probably result! Yes, I do love those RoC charts, too!**
14. **Try Dashboards: visit www.ceotools.com, click on New Tools Catalog, then scroll down to various dashboards on many business topics!**

FIX UP YOUR CHARTS!

From CEO Tools at www.ceotools.com

Many users have complained that Microsoft Excel's charting is not user-friendly and doesn't "work." This forced us to develop some information on using, applying, and overcoming Excel's charting shortcomings. Excel can indeed work, and we're all stuck with it, so here are a few tips, tools, and ideas based on extensive use of Excel's XP versions...other versions and operating environments before and after XP (e.g., 95, 2000, Vista, Seven) contain many of the same challenges, inconveniently re-packaged by Microsoft into even more challenging apps. Please use this guide to overcome these, but also please adapt our approach to different Excel versions. These tips also work for most charts in other software.

How to Re-Scale Your Charts: It is necessary to re-scale your chart when you first enter your data in any Trailing 12-Month (T12M) Chart or 12-Month Moving Average (12MMA), dashboard, or for that matter, any ordinary chart (it's just basic Excel 101A), and then every once in a while thereafter. The idea is to get your graph on each chart to "fill up" the vertical space of the chart border, so that your eye can most easily see ups and downs over the months. To re-scale, right-click in the vertical (left-hand, Y-axis) of each chart to get a "Format Axis" dropdown; then just select "Options" or "Format Axis" and you should see where you can select "Scale." Do select Scale and then change the Min, Max, Major & Minor Units, as well as the X-Axis Cross Point to be compatible with the full range of your calculated or entered numbers being charted. Again, the idea is to run your graph from your smallest number to the largest from that column (take a look at how we did it on T12M Charts at www.ceotools.com). Save after re-scaling!

Another thought: you may need to re-scale or change the horizontal axis to show the right months. At www.ceotools.com we re-set all charts each year so that you can download them with the upcoming year ready-to-go. If you want to do this yourself, just follow the same logic presented for the vertical axis to change your time (horizontal) axis.

How to Structure Your Charts: We like our charts to have two years of history plus the year we're currently tracking (currently in). What this does is allow you to see an overall trend, not just this year versus last. But at the same time, you don't want more than two years of history, else your chart might be scaled so severely that you don't see the fluctuations in current months that you need to see. So, let's say you want to set up a chart to track your sales each month during 2010 – you'll want to show each month of actual sales for 2008 and 2009 with the 12 months of 2010 on the chart with no numbers in them as you start the year. Take a quick look at the free PDF of the T12M Chart at www.ceotools.com to see an example of this.

How to Update Your T12M or 12MMA Charts Each Month: As you enter your regular monthly number each month into the data column for an Excel chart, it will be necessary to *copy-paste* the logic for calculating that month's *T12M* or *12MMA number* down one row each month as you enter the actual new monthly number.
